

L AVRS Quick Reference Guide

The Alabama Medicaid Automated Voice Response System (AVRS) enables providers to access information regarding check amount, claim status, recipient eligibility, third party resources, drug and procedure code pricing, and prior authorization requirements. When you dial 1(800) 727-7848, you can access this information 18-20 hours per day, seven days a week. This guide is intended to help you use AVRS quickly, accurately, and efficiently.

This quick reference guide consists of the following sections:

This information is not a guarantee of payment. Claims submitted for payment are subject to system audits (medical policy), edits, and applicable limitations.

L.1 AVRS Basics

This section provides general information about AVRS that will help you use AVRS more efficiently and effectively. It provides general information on how to access AVRS and what information is provided and describes AVRS spoken requests and responses, special function keys, and global messages. Of particular importance is the alphabetic table, described in Section L.1.2, Special Function Keys, providing number combinations corresponding to the letters of the alphabet. Providers who must enter data that contains both numbers and letters should read this section.

L.1.1 General Information

AVRS is available approximately 18-20 hours per day, 7 days per week. Scheduled down times usually occur during off-peak hours, such as late at night or very early in the morning.

To access AVRS, you must use a touch tone phone. Providers with rotary dial phones should contact the EDS Provider Assistance Center, from 8:00 a.m. until 5:00 p.m., Monday through Friday. For Pharmacy Providers only, the Pharmacy Help Desk is also available on Saturdays, 9:00 AM to 5:00 PM and can be accessed by dialing 1(800) 456-1242. Please refer to the Alabama Medicaid Provider Insider, a quarterly bulletin sent to Alabama Medicaid providers, for holiday schedules.

NOTE:

It is important to have all necessary information on hand prior to calling AVRS. AVRS is designed to give callers several chances to enter or correct data; however, the system will terminate the call if you fail to enter correct data within the allowed number of attempts, or if you cause the system to time-out. Please refer to Section L.1.4, Time-outs, Invalid Data, and Errors, for more information.

L.1.2 AVRS Spoken Requests and Responses

AVRS provides a spoken response to queries entered using a touch tone phone. Based on the information you enter, or the menu options you select, AVRS will provide a custom response. AVRS does this by translating responses to the data you enter into speech patterns.

Messages are spoken as recorded, because these do not change. However, other words, such as names, are spelled out. For instance, AVRS translates the last name "Doe" as D-O-E.

Likewise, AVRS speaks number values one number at a time. For example, the number '155' is spoken as 'one-five-five', rather than 'one hundred fifty-five'.

If the response represents a dollar amount, AVRS provides the response in a monetary format. For example, the dollar value '128432' is represented as 'one thousand, two hundred eighty-four dollars and thirty-two cents'.

AVRS translates date responses in a Gregorian format (the manner in which most of us express dates). For instance, the date '05/14/99' is spoken as 'May fourteenth, nineteen ninety-nine'.

L.1.3 Special Function Keys

You will receive better, faster results using AVRS if you understand how to use the following special function keys.

End of Data

Because the length of data you enter may vary (for instance, most providers have nine-digit numbers, but some have eight-digit numbers), you must signal AVRS when you have finished entering data. The pound sign (#) is the symbol you use to do this. You should always enter the pound sign key to mark the end of the data you have just entered. The following examples illustrate how to use the pound sign (#) to mark the end of data:

To enter provider number 123456789 Press 123456789#

To enter procedure code 11111 Press 11111#

Repeat Response or Prompt

AVRS is designed to provide you the information you need by using a series of prompts and responses. The system 'speaks' requests to you, such as available menu options, or a request to enter data. If you want AVRS to repeat the message, press the asterisk (*) key on your touch tone phone.

Alphabetic Data

AVRS uses information keyed on a touch tone phone, which does not provide a key for each letter of the alphabet. Sometimes, you will have to enter data that contains letters as well as numbers (for instance, some provider numbers contain letters and numbers). To do this, you must use a combination of the asterisk (*) key and **two** numbers to represent a particular letter.

L-4 July 2007

The table below describes the number combinations that represent the letters of the alphabet:

| A - *21 | G - *41 | M - *61 | S - *73 | Y - *93 |
|---------|---------|---------|---------|---------|
| B - *22 | H - *42 | N - *62 | T - *81 | Z - *12 |
| C - *23 | I - *43 | O - *63 | U - *82 | |
| D - *31 | J - *51 | P - *71 | V- *83 | |
| E - *32 | K - *52 | Q - *11 | W - *91 | |
| F - *33 | L - *53 | R - *72 | X - *92 | |

Using this table as a guide, enter data with a combination of letters and number in the following way:

Actual Provider Number ABC0099D

AVRS reads back this number ABC0099D

Void Data

If you enter a string of data (for instance, a provider number or recipient number), and make a mistake, enter two asterisks (**) to indicate that all the data you have entered in the current field should be deleted, and the data following the asterisk should be used in its place. This does not delete any data you entered as a result of a previous AVRS prompt. The following example demonstrates this functionality:

You enter 1245**123456789

AVRS reads back this number 123456789

You enter *21224***22224

AVRS reads back this number B224

Cancel Function

To cancel a transaction, press *99# at any prompt. AVRS will return to the main menu.

L.1.4 Time-outs, Invalid Data, and Errors

AVRS can respond only to what is entered by you, the caller. To receive information from AVRS, you must enter valid data in the correct format. When you make an error or fail to enter information when prompted, AVRS gives you another chance to correct the mistake. If you do not correct the error or respond in a timely fashion, AVRS will end the call.

Maximum Errors Exceeded

You have three chances to enter correct data when prompted. If you exceed the limit, AVRS plays the following message:

We're sorry – the data you entered is invalid. If you would like assistance from the Provider Assistance Center, press 0.

If you press 0, AVRS transfers you to the Provider Assistance Center, which will assist you during normal business hours. If you do not press 0 within 10 seconds, AVRS ends the call.

Maximum Time-outs Exceeded

You have ten seconds to enter requested data. The first time you exceed this limit, AVRS prompts you to enter the data. If you exceed the limit a second time, AVRS plays the following message:

You have not responded with the requested information. If you would like assistance from the Provider Assistance Center, press 0.

If you press 0, AVRS transfers you to the Provider Assistance Center, which will assist you during normal business hours. If you do not press 0 within 10 seconds, AVRS ends the call.

Invalid Data

If you enter a value that is not described as a menu option (for instance, if you press '9' after listening to the main menu, when '9' is not a valid option), AVRS plays the following:

Invalid option. Please re-enter.

AVRS then replays the menu options.

Maximum Transactions Exceeded

To ensure AVRS is available to all providers, you are limited to ten (10) transactions per phone call. For each main menu item, AVRS counts **one** transaction using the following criteria:

- For 'Check Amount,' (Option 1), each time you enter a different provider number
- For 'Claims Status' (Option 2), each time you check another claim for the same recipient, or each time you check a claim for a different recipient
- For 'Recipient Eligibility Verification' (Option 3), each time you verify eligibility for a recipient
- For 'Drug Pricing Information' (Option 4), each time you enter an NDC
- For 'Procedure Code Pricing Information' (Option 5), each time you enter a procedure code
- For 'Prior Authorization Verification' (Option 6), each time you enter a prior authorization number
- For 'Household Inquiry' (Option 7), each time you request an inquiry for recipient household information

L-6 July 2007

When you exceed the ten transaction limit, AVRS ends the call after playing the following message:

In order to serve as many callers as possible, we must limit the number of inquiries per call. Please call again for any additional inquiries you may have.
